

Hopefully, the monsoon season is almost over. The Missouri River is wreaking havoc on the area and has run us out of Rulo, NE. That means a couple of extra crews to send to other jobs like Broadway Viaduct and Iowa Falls. The following pictures tell the story:

Rulo, NE under water

Broadway Viaduct, CB, IA  
1537' x 60' Prestressed  
Bob, Ben, Doug, and Nels are working on the second stage. The traffic is traveling on the right hand side of the bridge.

Iowa Falls, IA  
289' x 42' Steel Arch Bridge  
Larry, Scott C, and Chad have almost finished the conc work and will be ready for steel.

I-35 over EP True in WDM  
Dual 441' x 19' Prestressed  
Darren and Scott D are building these bridges in the median of the existing interstate.

Corps Riverwalk  
Chuck and crew are building flood walls in downtown Des Moines.

Polk IA 141  
Tim just began the overlay of this bridge. The picture was taken from Dan's driveway!

I don't have pictures of Jack finishing some overlays in Allamakee County or Evan and Dave replacing joints in Iowa and Tama counties. Kelly finished the work with KTU in Missouri and is starting a re-deck in Tama County. Jake is moving into a large bridge job over the Platte River in Fremont, NE.

We're at the end of the first half of the year already. We've done a great job of avoiding accidents. Let's keep it that way!

Harrison Co., IA  
Jeff and Brad are working on 2 Twin Overlays with Overhang Replacement
