

WORK 2007

It doesn't seem possible that the year is almost a 1/3 over. Work is up and running across Iowa and quite a bit in northern Missouri.

The last pieces of the I-235 puzzle are falling into place. **Scott D.**, **Scott C.** and **Nels** are replacing the last portion of the Des Moines River bridge. **Tim** is working on the noise walls with newly promoted, Assistant Superintendent Doug Larimor. And, **Larry** and **Kelly** are constructing the new steel girder twin bridge at the NE Mixmaster.

Jeff and **Dave** are finishing the repairs to SW 8th Street in Des Moines and **Bob** just overlaid a small bridge in Adair County. **Jack** has been patching in Ottumwa and will soon move to Bremer County north of Waterloo.

Chad is setting steel girders on the 1300' long Avenue G viaduct in Council Bluffs. **Evan** is getting the large culvert project in Des Moines sold.

Chuck, **Jeff**, **Ben**, **Brad**, **Josh** and **Jake** are all working in Missouri re-decking or overlaying several bridges. We're a sub to the asphalt paver, Chester Bross, on two projects and we're prime on the rest. We have a total of 21 bridges to work on in Missouri.

OFFICE UPDATE

We're waiting. Yes, we're still waiting. We've been waiting about six months for the glass atrium to get installed so the interior of the new office could be completed. It might actually happen this next week. If so, we will be in before Independence Day which Norma had so cruelly predicted!

Employees:

Send me any pictures or news you would like posted. Robert
