

WORK 2007

A lot of work has been done since the last Newsletter! Jake, Josh, and Chuck have moved to our last Missouri Job for this season...five redecks near Bethany.

I-235 over the DSM River and the Mixmaster bridges are essentially done. Several overlays are done.

Jeff, Jack (and soon, Ben) have moved to a huge overlay in Sioux City. It is the Gordon Street Viaduct which is just shy of 4000' long.

Evan and Brad have started patching piers on another large overlay job in Ottumwa...US 63 over the DSM River.

Chad, Bob, and Scott D. have poured about 2/3 of the deck on the 1400' long Avenue G bridge in Council Bluffs.

Tim is finishing up the noise walls in Des Moines, Kelly is redecking a bridge near Iowa City, Larry and Dave are overlaying bridges north of Waterloo, and Nels and Scott C are wrapping up the work on MEGA1 Downtown.

NEW WORK

HARRIS OVERPASS, LINCOLN, NE
